

Transmission Service Experts for Your Car or Truck

Dandy Auto performs state-of-the-art transmission fluid exchange services and computerized diagnostics.

Our equipment allows us to remove 95% of the old transmission fluid for replacement instead of only 20% as with the old technology. This fluid exchange service is recommended every 40,00 to 50,000 KM's to prevent severe transmission wear. We use only the best transmission fluid available as recommended by the manufacturer and also install a chemical shift improver with each service.

Every Dandy Auto Transmission Service includes the following performed by a Certified Technician:

- Evaluate the condition of the old oil to give us an indication of the transmission's condition.
- Flush out the old contaminated fluid and replace with new high quality fluid using our state of the art flushing equipment. We also install a leading additive to your transmission fluid to reduce wear, varnish and improve shifting.
- Road test the vehicle to test operation and check for leaks.

Call us today to schedule your appointment 403-945-1555 or you can use our convenient Online Appointment Form!
